

# Advance Security Solution for a long-standing Banking IT Solution Leader

## Overview

Acute Informatics is an expert in developing Core Banking Solutions, with over 15 years of experience as an Independent Banking Software Vendor. Their EasyBankCore™ software is running seamlessly in over 100+ co-operative banks in India and 3 international banks. They also offer a range of additional delivery channels like NetBanking, MobileBanking, ATM, ECOM, POS, NACH, RTGS/NEFT, SMS, and 30 other banking-related solutions, providing a comprehensive and customized experience for their clients.

Acute Informatics, a prominent Independent Software Vendor, was on the lookout for a reliable and capable partner to conduct a comprehensive security assessment of their vast network of systems and banking solutions. eSecurify outshone other vendors by presenting a Proof of Concept, which emphasized crucial discoveries in Acute Informatics' application, resulting in a successful partnership to monitor the security of their products. This achievement highlights eSecurify's commitment to providing exceptional cybersecurity solutions that surpass their clients' expectations, while also showcasing their innovative approach to the industry. By partnering with eSecurify, Acute Informatics can rest assured that their products are impervious to potential threats and breaches, ensuring their clients' peace of mind.

Acute Informatics Pvt. Ltd.

### Industry

Banking IT Solutions

### Location

India

### Case Study

Securing Banking IT Solutions to comply with RBI guidelines

### Technology

Thick Client

## Challenges

To ensure the security of their 14+ Banking IT Solutions, complied with RBI regulations.

Carefully managing internal network infrastructure where the banking software development takes place while assessing its security.

Along with ensuring the security of their IT Infrastructure & Critical Banking Solutions, It was essential for Acute's internal team to receive cyber security training to uphold high-security standards constantly which could empower them to ensure top-notch security measures for its products and internal network.

*"Before eSecurify, we struggled to find someone who could grasp our banking applications and help fortify our architecture, banking applications, and our employees' security skills. We sought a youthful talent to bolster our security measures. We received vulnerability assessment reports from other vendors, but they didn't comprehend our application or yield the insightful findings that eSecurify provided. With eSecurify's assistance, we enhanced our security posture significantly."*

Chirag Patel  
CEO, Acute Informatics

## Solution

Our hybrid approach has comprehensively covered all security aspects of Acute's highly sensitive banking applications. By focusing on Acute's internal network, where the sensitive data resides, we enforced security protocols to enhance its security. In addition, we also provided cybersecurity training to Acute's internal team to enhance their skills and capabilities. Our approach has been thorough, effective, and aimed at safeguarding the integrity and confidentiality of Acute's sensitive data. We remain committed to continually monitoring and evaluating our approach to ensure that it remains resilient against emerging threats.

## Benefits of eSecurify

eSecurify pays close attention to every detail, ensuring that no security issue goes unnoticed.

eSecurify is committed to providing exceptional service to its clients, putting their needs first and ensuring their satisfaction.

eSecurify provides comprehensive reporting on its security assessments, allowing clients to fully understand the results and take appropriate action.

## About eSecurify

eSecurify is an award winning cyber security company based in India that offers services such as vulnerability assessment, penetration testing, and security consulting. Founded by Smit Shah in 2016, the company has established itself as a reputable player in the cybersecurity industry. eSecurify has served more than 110 clients across various sectors, including banking, finance, and healthcare. The company has also expanded its services globally and has served clients in over 10 countries. With its expertise and innovative solutions, eSecurify is committed to providing comprehensive security solutions to protect organizations from cyber threats. We recently launched Pentest Ground, a product that provides full-stack security assessments.
